

# Regulatory Update

Nigeria – Change in sample requirements from January 2015

The Nigerian Communications Commission (NCC) has recently advised changes in sample requirements from January 2015:

For all Notebooks, tablets and mobile phones, one as sold sample must be submitted for Type Approval.

For all other products, samples are not mandatory but NCC have the right to request a sample once their review is underway.

Test reports for mobile phones and tablets should show compliance to EU standards.
