# Regulatory Update

23<sup>rd</sup> June 2016

## **Voluntary Approval for devices operating on 2.4GHz and 5GHz bands with an output power of <60mW no longer possible in Vietnam**

The Ministry of Information and Communications (MIC) in Vietnam has announced that from 1<sup>st</sup> of June 2016, voluntary Approval for devices operating on either 2.4GHz or 5GHz bands, with an output power of <60mW, will no longer be granted. A formal Letter of No Action (LoNA) will be granted instead.

The lead-time to obtain the LoNA will depend on a specification of the product and whether it is clearly defined in the latest version of Circular 05/2014/TT-BTTTT. Lead-time for products defined in the Circular is expected to be around 3 weeks, whereas for products not included in the Circular with an output power of <60mW, the lead-time maybe longer.
