

Regulatory Alert – Egypt

4G LTE now permitted in Egypt

The Egyptian Regulator, *National Telecommunications Regulatory Authority* (NTRA) has confirmed that 4G LTE is now permitted in Egypt. The 4G LTE bands open in Egypt are B1, B3, B8 and B28.

PCS have been advised that there is no change to Type Approval process for cellular host devices – it remains the case that Type Approvals for cellular host devices must be obtained via a local testing process. The NTRA have also confirmed that there will be no impact to already approved devices.

NTRA have informed PCS that details regarding the introduction of 4G technology in Egypt have not yet been published on their official website.

PCS will continue to monitor any developments and will keep customers updated once any additional information is made available.
